shopEase

Old Features

1. Retailer Modules:

- **Shop Registration**: Retailers can register their shops, ensuring a unique digital presence within the platform.
- **Shop Profile Maintenance:** Retailers have the ability to update and maintain their shop's profile, ensuring current and accurate shop information.
- **Sales Offers Management:** Retailers can initiate, update, or conclude sales offers, ensuring timely promotions to attract customers.

2. Customer Modules:

- **Customer Registration:** Allows customers to create and maintain their profiles, enabling a personalized shopping experience.
- **Nearby Shops Locator:** Customers can view and navigate to nearby shops based on their current location or specified areas.
- **Order Booking:** Provides customers the ability to book orders from their preferred shops, ensuring a seamless shopping experience.
- **Geo-fenced Sales Notification:** When within a specified geo-fenced area, customers receive real-time push notifications about ongoing sales or promotions.
- **Offers Viewer:** Allows customers to view and browse current offers from various retailers.
- **Retailer Communication Interface:** Direct communication channel enabling customers to interact with retailers for inquiries or feedback.

3. Inventory management for retailer:

- **Product Entry:** Allows retailers to add new products to their inventory, with essential details like product name, description, price, and quantity.
- **Inventory Alerts:** Sends notifications to retailers when stock levels are low or when items are out of stock. This can assist retailers in maintaining an optimal inventory level.

4. Payment Modules:

- **Payment Gateway Integration:** Allows customers to make payments within the app without redirection to third-party sites. Integration of various payment methods like credit/debit cards, wallet.
